SENATE COMMITTEES ON COMMERCE & CONSUMER PROTECTION AND WAYS & MEANS
Thursday, April 4, 2024 — 10:09 a.m.

Ulupono Initiative supports HB 2614 HD1 SD1, Relating to Renewable Energy.

Dear Chair Keohokalole, Chair Dela Cruz, and Members of the Committees:

My name is Micah Munekata, and I am the Director of Government Affairs at Ulupono Initiative. We are a Hawai'i-focused impact investment firm that strives to improve the quality of life throughout the islands by helping our communities become more resilient and self-sufficient through locally produced food, renewable energy and clean transportation choices, and better management of freshwater resources.

Ulupono supports HB 2614 HD1 SD1, which requires government entities in the State that issue building permits to implement SolarAPP+ or a functionally equivalent online automated permitting platform that verifies code compliance and issues permits to licensed contractors for solar distributed energy resource systems in real time by 1/1/2025; and requires government entities in the State that issue building permits in areas served by an investor-owned electric utility to adopt a self-certification for solar distributed energy resource systems that are not SolarAPP+ compatible.

Ulupono supports the use of SolarAPP+, or an equivalent platform, to help streamline solar and energy storage project permitting. The Hawai'i State Energy Office recently published its Hawai'i Pathways to Decarbonization Report, which identifies, among other things, the significant need for additional renewable energy generation to meet broader economy-wide decarbonization goals.¹ Solar photovoltaic (PV) systems are becoming so common that there is little risk and much to gain in terms of timeliness with such systems, as more renewable energy can be installed at a faster rate. The self-certifying procedure proposed in this bill supports a streamlined process for renewable energy projects, which may even decrease the workload on already burdened county planning and permitting departments.²

Thank you for the opportunity to testify.

Respectfully,

Micah Munekata
Director of Government Affairs

² The counties all struggle with a backlog of permit applications, so any effort to streamline the process would be welcomed. For example, the Civil Beat recently noted that the median residential permitting time for the City and County of Honolulu's Department of Planning and Permitting, was 330 days and commercial jobs were at a median of 420 days. <https://www.civilbeat.org/2023/12/honolulus-building-permit-delays-a-nightmare-decades-in-the-making/>
